

PODEROSA starts the homologation process for service or construction suppliers

Poderosa informs that since the 27 of October, all service or construction suppliers must have the homologation certificate to participate in the bidding processes with Poderosa. Since the 30th of November, all providers that provide services must have been homologated to continue providing the service.

Poderosa has signed an agreement with Investing S.A.C. to carry out the supplier homologation process for companies that wish to participate in the bidding processes, and will also be in charge of homologate companies that to date are providing services through a contract with Poderosa.

For Poderosa it's key to have a base of suitable suppliers to know their ability to comply with the requirements of scope, time, quality, costs and due diligence. The evaluation criteria have been carried out in compliance with Poderosa's policies. This certificate constitutes a requirement for the preparation of the service or construction contract.

Suppliers or contractors must manage the evaluation and presentation of the homologation certificate. For this purpose we request to contact the representatives of the company Investing SAC.
